OXFORD INTERNATIONAL SCHOOL

# Website admin guide

Everything you need to run the news pages and read admissions enquiries: your links, the daily steps, and what to do if something looks wrong.

## 1. Your links

### Forms — anyone with the link can use them

| WHAT IT IS | WHO USES IT | LINK |
|---|---|---|
| PUBLIC **Admission enquiry** | Parents. Every "Admission enquiry" button on the website opens it. It also lets them ask for a visit day. | https://forms.gle/N8BqpRt8tSGS98Kc7 |
| PUBLIC **Share a news article** | Staff, students and parents who want to send in an article. | https://forms.gle/gyCmri5WDjEjEL1T6 |

### Sheets — private; you must be added as an editor

| WHAT IT IS | WHO USES IT | LINK |
|---|---|---|
| PRIVATE **News sheet** | You. Read new articles here and approve them. | https://docs.google.com/spreadsheets/d/15Be6TT03EPlyDUVifhJRmd0cW98Od8CCVduJmOlLMIU |
| PRIVATE **Enquiries sheet** | You and admissions staff only. It holds parents' names, emails and phone numbers. | https://docs.google.com/spreadsheets/d/1HYi_jLG5coKX9iHNlUsav1gqH40_2BxH-z4y5laMq04 |

Photo folder — for article photos

| WHAT IT IS | WHO USES IT | LINK |
|---|---|---|
| PUBLIC BY LINK<br>**Website photos folder** | You. Upload photos here, copy each photo's link into the News sheet. Anything in it can be viewed by anyone with the link. | https://drive.google.com/drive/folders/1ZpHrY_aoq8LuXAFEw3SywQnl8C2VNdzX |

> **Never share or publish the Enquiries sheet.** If a link opens with "You need access", ask the person who set this up to add your Google account as an editor.

## 2. How an article reaches the website

1. **Someone submits the news form.** The form asks for a title, category (News or Event), date, their name and role, and the article. You can use the same form for your own articles.
2. **It appears in the News sheet.** Open the tab called *Form Responses 1*. Each submission is one row, and **new rows are highlighted yellow** until you approve them.
3. **Read it.** If it needs a fix, edit the words directly in the cell. Check there are no children's full names or photos without a parent's agreement.
4. **Choose a Topic.** In the `Topic` column pick from the dropdown (Sports, Clubs, Celebrations…). The article then also appears on that Activities page and in the Gallery. Leave it empty if none fits.
5. **Add photos (optional).** See "Adding photos" below.
6. **Approve it.** In the `Approved` column choose `Yes`. Nothing goes on the website until it says Yes. The yellow highlight disappears.
7. **The site updates at the next rebuild.** The website rebuilds itself every morning. See "Publish now" below for doing it sooner.

> **Allow a few minutes.** After you set Approved to Yes, Google takes a few minutes to update the public copy of the sheet. A rebuild started in that window can miss your article. Wait, then rebuild.

### Adding photos

1. Open the **photo folder** (link in section 1) and drag your photos in. Use only photos you are allowed to publish.
2. Right-click a photo, choose *Share* → *Copy link*.
3. In the News sheet, click the article's `Photos` cell and paste the link. For more than one photo, press `Alt+Enter` (Windows) or `Option+Enter` (Mac) inside the cell for a new line and paste the next link. Links can also be separated by a space or a comma.
4. Optional caption: type `|` after the link, then the words, for example *…/view | The relay team at the finish*.

**Photos sent through the form (if enabled).** If the news form has a *Photo upload* question, contributors attach photos there and they appear in a `Photo upload` column. You do nothing extra: approving the row (`Yes`) makes those photos usable. They stay private until you approve. Contributors must sign in with a Google account to use that form. Only photos are published; other file types are skipped.

iPhone photos (HEIC) work as they are; no need to convert them. Up to 12 photos per article. The first photo becomes the cover image. Photos are resized and location data is removed automatically when the site rebuilds.

### Publish now

In the News sheet menu bar there is a menu called **Oxford site**. Choose **Publish approved articles now** to update the website within about two minutes instead of waiting for the morning.

> **Current status:** this button works only once the website is hosted and its rebuild link has been saved (*Oxford site → Set rebuild link…*). Until then, ask the person who built the site to rebuild it.

## 3. Writing and approving well

### Category and date

- **News**: something that has happened. Use the day it happened.
- **Event**: something coming up. Use the day of the event. It shows under "Upcoming events" until that day has passed, then under "Past events".

### Article text

- Plain text only. Bold, colours and links from other programs do not carry over; a web address shows as ordinary text.
- Press Enter to start a new paragraph.
- Keep titles short. Very long titles still display, but read better when brief.

### Where articles appear

| PLACE | WHAT IT SHOWS |
|---|---|
| **Home page** | The latest 3 items. Upcoming events come first, then the newest news. |
| **News page** | The latest 20 news items. |
| **Events page** | All upcoming events and the 12 most recent past events. |
| **Activities pages** | The latest articles with the matching Topic (for example Sports). |
| **Gallery** | Every article that has photos, grouped by Topic. |
| **Archives** | Everything older. Nothing is ever deleted automatically. |
| **Its own page** | Every approved article has a page that can be shared by link. Its web address is created automatically (*Slug* column) and stays the same even if you change the title. |

### Taking an article down

1. In the News sheet, change `Approved` to `No`, or delete the row.
2. Rebuild the website (use *Oxford site → Publish approved articles now* once it is connected). Do this straight away if a parent has withdrawn consent.

Copies already saved by search engines or other websites cannot be recalled by the site.

## 4. Admissions enquiries

- Every enquiry and visit booking lands as a new row in the **Enquiries sheet**.
- The website promises families a reply **within two working days**. Visit times are confirmed by phone or email.
- The privacy page says enquiries are kept while a conversation continues and for up to twelve months afterwards, then deleted. Delete old rows accordingly.
- Keep this sheet private: share it only with people who handle admissions.

# 5. Please don’t change these

The website finds each column by its heading, so a few changes will stop articles appearing.

| DO NOT | WHY |
| --- | --- |
| **Rename a column heading in the News sheet (Title, Category, Date, Approved, Topic, Photos, Slug…) or the wording that starts a form question** | The website can no longer find the column. Fixing a typo later in a question’s wording is fine. |
| **Delete the *Approved*, *Topic*, *Photos* or *Slug* columns** | Articles stop appearing, or lose their topic, photos or permanent address. |
| **Change the *Slug* of an article that is already live** | Its old web address stops working. |
| **Edit, rename or delete the *Published* tab** | It is filled in automatically and is what the website reads. |
| **Share the Enquiries sheet or the website’s public data link** | Enquiries hold personal details of families and children. |

# 6. If something looks wrong

| WHAT YOU SEE | WHAT TO CHECK |
|---|---|
| **An approved article is not on the website** | 1. Is `Approved` exactly `Yes`? 2. Does it show in the *Published* tab? 3. Have you waited for a rebuild (morning, or Publish now) plus a few minutes? 4. Does the row have a date, a title and article text? A row missing any of these is skipped. |
| **An article is live but its photo is missing** | Check the photo link was pasted in the *Photos* cell of that row, the photo is inside the school photo folder, and the link opens when you are signed out. Then rebuild. A bad photo link never blocks the article; it is just skipped. |
| **The Published tab shows an error or looks empty when it shouldn't** | Do not edit it. Tell the person who built the site. |
| **A date looks strange (a five-digit number)** | The website understands it, but tell the person who built the site so the formula can be checked. |
| **No email alert for a new submission** | Check spam. Alerts go to the Google account that ran the setup. Another person can turn on Google's own alert: open the form, Responses tab, three dots, "Get email notifications for new responses". |
| **The website did not rebuild in the morning** | Use *Oxford site → Publish approved articles now*. If it says no working link, the rebuild link needs saving again. |
